UserStory:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.
I want to easilyaccessandupdateemployerdetails,aswellasdistinguishbetweenonline and offline customer records using record types, allowing for personalized interactions.
Additionally, I need the application to automate salescalculations,suchasorderquantity and total bill amount, to ensure accurate and efficient transactions.
Moreover,Irequiretheabilitytogenerateinsightfulreportsanddashboardstosummarize and analyze sales data effectively, aiding in decision-making and strategy development.
Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

ProjectOverview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

- Secureloginandpasswordpolicies

NFR-3:Reliability

TheCRMsystemshouldworkcorrectlyatalltimesandstoredataaccuratelywithout loss.

Requirements:

- Automaticdatasaving
- Regularsystembackups
- Errorhandlingmechanisms
- Stablecloudenvironment

Example:

Ifauserentersorderdataandtheinternetdisconnects,thesystemshouldsavethe information and restore it later.

Salesforcecloudensuresautomaticbackups.

NFR-4:Performance

Thesystemshouldrespondquicklyandhandlelargeamountsofdataefficiently.

Requirements:

- Fastpageloading
- Quickreportgeneration
- Smoothdashboardrendering
- Minimaldelay

Example: Whenamanagergeneratesmonthlysalesreportsforhundredsofcustomers, the report should load within 2–3 seconds.
